SUMMARY

MERN Stack Developer with a strong foundation in Data Structures and Algorithms and experience in building full-stack web applications using React.js, Node.js, Express.js, MongoDB, and Redux Toolkit. Passionate about developing scalable solutions and writing clean, maintainable code.

EDUCATION

Dr. Akhilesh Das Gupta Institute of Professional Studies (September 2023 - September 2027)

- Bachelor of Technology - Computer Science
- CGPA: 9.27

PROJECTS

Gather-Social Media Platform (React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Vercel)

- Developed a Full-stack social media application using the MERN stack. Built a secure custom authentication system from scratch and engineered a structured backend following the MVC design pattern to handle user interactions and data streams cleanly.
- Led the frontend development using React JS to build a dynamic, user-friendly interface featuring live news feeds and structured user profiles.
- Implemented centralized state management using Redux Toolkit to seamlessly synchronize real-time user data and application state across multi-layered components.
- Engineered a secure custom user authentication and session management system from scratch utilizing industry-standard password hashing and token-based access controls.
- Architected a robust Node JS/Express backend, configuring custom CORS policies and environment-driven variables to securely interface with a remote MongoDB Atlas database.

NextRole - Career & Job Application Platform (React.js, Redux Toolkit, Node.js, Express.js, MongoDB)

- Engineering a scalable, full-stack job portal using the MERN stack, implementing a strict MVC architectural pattern in the backend to cleanly manage data interactions between job seekers, recruiters, and application statuses.
- Building responsive, role-based frontend using React JS, featuring dynamic user dashboards with advanced search filters, structured candidate profiles, and real-time application tracking.
- Integrating Redux Toolkit for efficient global state management, seamlessly synchronizing complex application data, job feeds, and active user sessions across deeply nested UI components.
- Architecting secure backend REST API with Node JS and Express, featuring custom JWT authentication and optimized queries communicating with a remote MongoDB Atlas database.

ACHIEVEMENTS

- Solved 650+ DSA problems across LeetCode and GeeksforGeeks, maintaining consistent participation in LeetCode weekly and biweekly contests to hone time-bound problem-solving.
- Shortlisted for Round 2 of Flipkart GRiD 8.0, India's premier national engineering challenge, out of thousands of applicants.

TECHNICAL SKILLS

- **Programming Languages:** C++, C, JavaScript
- **Web Technologies :** HTML, CSS
- **Frameworks :** Tailwind CSS, React.js , Node.js , Express.js , Redux Toolkit
- **Databases :** MongoDB,MySQL
- **Development Tools:** Git,GitHub
- **Computer Fundamentals :** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
